

Disassembling Asus Transformer TF101 Charger

The charger and cable for the TF101 are notoriously fragile. After replacing the cable the times the USB port on the charger broke. The metal tabs inside got bent. Disassembly was in hope that it would be easy to replace the USB port.

INTRODUCTION

How to disassemble the charger unit.

www.iFixit.com

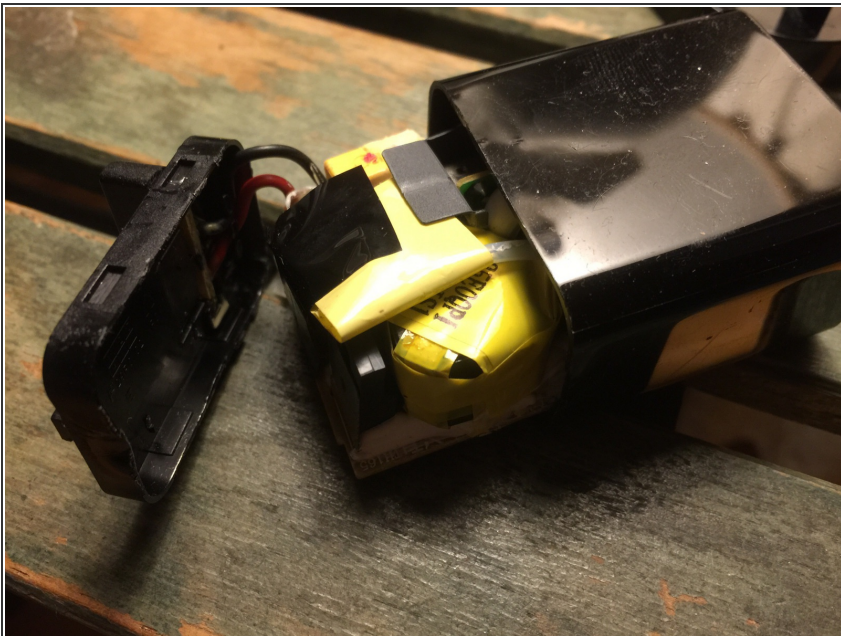

- Slide the plug to release from the transformer unit

Step 2 — Pry open transformer unit

- Slip a knife blade into the seam on one of the long edges. It should go in a fair way. Lever the lid upwards. It requires quite a bit of force to release. Be careful as the outer casing is flimsy and it will be deformed.

Step 3 — Slide out the internals

- Once the lid comes off you can slide out the internals.

To reassemble your device, follow these instructions in reverse order.
